

Baker Rehabilitation Unit at Keswick

Welcome to a smooth transition
between hospital and home.

KESWICK

“We are so pleased with the progress our father has made, and even more impressed with the love and care that seems to go into every detail at Baker.”

– Satisfied family member/caregiver

“My mother was so tired of hospital beds and eager to be home. The people at The Baker Unit at Keswick made her feel so comfortable—almost like home, except she had the professionals and the tools she needed to get better.”

– A grateful daughter

Welcome to the Baker Rehabilitation Unit at Keswick

At the Baker Rehabilitation Unit, it is our goal to help each patient regain their independence in order to return home.

A patient who has undergone surgery or stayed for more than a few days in a hospital has been through an intense emotional and physical experience. We are committed to a smooth transition between hospital and home.

Standard rehabilitative care services and amenities:

- Physical therapy, occupational therapy, speech language pathology
- All private rooms with powder room
- Delicious meals and snacks, including therapeutic diets
- Full calendar of social and recreational activities
- Laundry services
- Nursing services (except private duty) and most medical supplies
- Social services
- Religious services of various denominations
- Extensive library and book cart
- Services of full-time on-site medical director
- Internet Cafe

Over a century of excellence in the care of seniors in our community.

After well over a century of excellence, Keswick remains dedicated to enhancing the lives and well-being of individuals in our community. Today, we offer advanced therapies and technologies. The Baker Rehabilitation Unit enjoys the benefits of this prestigious history, while providing the highest quality post-acute rehabilitation.

An important step between hospital and home.

The Baker Rehabilitation Unit is a 68-bed facility, designed to help patients with the transition between a hospital stay and home. While here, individuals receive the intensive therapy they need to grow stronger in mind, body and soul. The result is a safer, more independent return to daily life following:

- Joint replacement
- Stroke
- General surgery
- Hospitalization for reasons requiring a prolonged stay

What makes us different?

All private rooms.

The comforts of home are reflected throughout our facility and especially within our private rooms. We believe rehabilitation patients are more focused and positive when

they are comfortable in their environment. So while many post-acute rehabilitation facilities continue the tradition of shared rooms, the Baker Rehabilitation Unit offers every patient his or her own room, complete with a private powder room, Internet access, and cable TV. Along with a superior menu and excellent food, we provide a smooth transition from hospital to home.

Advanced therapies with a healing touch.

Together, our physical and occupational therapists, along with speech language pathologists, offer a wide variety of techniques to treat patients. With their hands-on skills coupled with a compassionate touch, they've earned the trust from both our patients and their families. It's that combination of caring, skill and our beautiful state-of-the-art rehabilitation gym that truly sets us apart.

Dedication to quality and compassion.

Every patient has a unique history, personality, and medical requirements. That is why healing at the Baker Rehabilitation Unit is about creating positive outcomes, one connection at a time. Here, healing encompasses everything, from the appropriate caring and encouragement to medical resources and the highest quality rehabilitation resources that fit each patient's specific situation. Our goal is a positive outcome and a safe, satisfactory return to the home.

Expect more.

- All private rooms for privacy and comfort
- Quick turn around for admitting
- Advanced rehabilitation services, nursing and medical care
- Compassion, initiative and expertise
- Over a century of excellence in care
